

數學系課程核心教材內容

| | | | | | |
|---|---|------|----|------|---------|
| 課程名稱：(中文) 高等微積分(一) (英文) Advanced Calculus (I) | | | | 開課單位 | 學士班 |
| | | | | 課程代碼 | 2102001 |
| 學分數 | 4 | 必/選修 | 必修 | 開課年級 | 二 |
| <p>教學目標：訓練學生之數學分析的能力</p> <p>課程概述：討論函數的連續、可微及積分性質</p> <p>先修科目或先備能力：微積分(一)(二)</p> | | | | | |
| 建議參考書目 | Wade, <i>An Introduction to Analysis</i> . Kosmala, <i>A Friendly Introduction to Analysis</i> . | | | | |

課程大綱

| 單元主題 | 內容綱要 | 上課週數 |
|-----------------------------------|---|------|
| Sequences in \mathbb{R} | (a) Completeness axiom. (b) Limits of sequences. (c) Limit theorems. (d) Bolzano-Weierstrass Theorem. (e) Cauchy sequences. | 3 |
| Continuity on \mathbb{R} | (a) Two-sided limits. (b) One-sided limits. (c) Continuity. (d) Uniform continuity | 4 |
| Differentiability on \mathbb{R} | (a) The derivative. (b) Differentiability theorems. (c) Mean-value theorem and Taylor's formula. (d) Local extrema and second derivative test. | 3 |
| Integrability on \mathbb{R} | (a) Riemann integrals. (b) Fundamental theorem of Calculus. (c) Improper integrals. | 3 |
| Infinite series of functions | (a) Uniform convergence of series. (b) Power series. (c) Analytic functions. | 3 |

課程大綱

| 單元主題 | 內容綱要 | 上課週數 |
|-------------------------------------|--|------|
| Euclidean spaces \mathbb{R}^n | (a) Open sets and closed sets in \mathbb{R}^n . (b) Interior, closure and boundary. (c) Connected and disconnected sets. (d) Compact sets. | 3 |
| Convergence in \mathbb{R}^n | (a) Limits of sequences. (b) Limits of functions. (c) Continuous functions. | 3 |
| Differentiability on \mathbb{R}^n | (a) Partial derivatives. (b) Definition of differentiability. (c) Local extrema and second derivative test. (d) Mean-value theorem and Taylor's formula. (e) Inverse and implicit function theorems. | 4 |
| Integration on \mathbb{R}^n | (a) Jordan regions. (b) Riemann integration on Jordan regions. (c) Iterated integrals. (d) Change of variables. | 3 |
| Vector calculus | (a) Curves and surfaces. (b) Green's theorem. (c) Divergence theorem. (d) Stoke's theorem. | 3 |
